

**QUOTES ABOUT OF THE CME PROGRAM FROM HEALTH CARE OFFICIALS OF
ARMENIAN GOVERNMENT AND LEADING CLINICS**

“FAR Program “Training of regional physicians in Yerevan” highly contributes to the development of continuing Medical Education in Armenia.

In anticipation of partnership and collaboration, we hope the suggestions that have been brought up will also be implemented in future.

RA Ministry of Health, in its turn, is ready to support the activities envisioned within the framework of the abovementioned programs”.

H. Qushkian

Minister of Health of RA

Highlighting the development of continuing medical education, RA Ministry of Health welcomes Continuing Medical Education and Salzburg International Medical Seminars Programs implemented by FAR Fellows Alumni Association.

Taking into account the positive opinion of leading Armenian specialists’ about the program and specialists’ staff implementing it, RA Ministry of Health is ready to assist arranged activities in the framework of the abovementioned programs.

N. Davidyan

Former Minister of Health of RA

“The importance of this program lies in the context that knowledge and skills obtained in foreign hospitals and conferences by the prominent doctors of Yerevan medical institutions are not left in the capital and are spread in all marzes of Armenia. It increases the quality of health services in Armenia.”

Professor A. Babloyan
Chief Director of Arabkir joint Medical Center –
Institute of Child and Adolescent Health
Former Minister of Health of RA

“By getting training in Yerevan, community physicians get acquainted with and learn how to use new technologies and equipment. The most important is that they will use the equipment provided by FAR in their work which not only lighten their work but also increase the security and safety of patient’s life and the quality of treatment.

It is important that community doctors not only are improving their specialization but also are advancing their English language and computer skills that will help them to use special literature and informational resources more broadly.”

G. Stamboltyan
Director of “Kanakaner - Zeytun” Medical Center
Former Minister of Health of RA

“Continuing Medical Education” Program has national significance. The program creates opportunities for community doctors to be trained in the best medical centers of Yerevan. In the scope of the program community doctors become familiar with the newest methods of treatment and diagnosis and apply new skills in their practical work while community hospitals are provided with new medical equipment.”

Professor G. Okoev
Director of Research Center of Maternal
and Child Health Protection
