

TB Conference in Armenia.

On October 30, 2010 Armenian association of TB specialists, YSMU clinical division of TB and FAR organized one day conference/workshop on actual topics of TB in YSMU Zeytun Campus, Yerevan. Leading specialists and experts in the field presented the epidemiological situation in our country. All projects, programs were implemented towards to improvement of TB situation in Armenia were presented to auditorium too. In their speeches, *Marina Safaryan*, MD, Professor, Head TB Specialist of RA, President of Association of Armenian TB Specialists and *Yelena Stamboltsyan*, Professor at the Republican TB Dispensary encouraged all participants to more activate the professional network with TB specialists as well as other specialists in primary health care level.

Almost all TB specialists from overall Armenia were participating in this event (approximately 60 physicians, 20 of them from RA regions).

One of the most important facts was that the whole conference went with interactive discussions and exchange of experience.
